LEADERSHIP & MANAGEMENT / PM-LEA-004

Management Fundamentals

COURSE OVERVIEW

This programme develops a working approach to management fundamentals in the context of management priorities and execution. Participants move from understanding the main concepts to examining a case, testing alternatives and explaining a practical recommendation. The three modules focus on planning, organising work and accountability. Examples are selected after the training brief so that they reflect the responsibilities and experience of the participant group.

LEARNING OBJECTIVES

1. Explain the role of planning and identify the information required for a reliable assessment.

2. Use a structured worksheet to examine organising work and compare reasonable alternatives.

3. Identify assumptions, missing evidence and implementation concerns related to accountability.

4. Prepare a decision brief with responsibilities and performance measures for discussion with a manager and team.

5. Translate the exercise into a workplace action plan with owners, review points and measurable progress.
