MARKETING & CUSTOMER EXPERIENCE / PM-MAR-008

Communicating through Digital Channels

COURSE OVERVIEW

This programme develops a working approach to communicating through digital channels in the context of customer needs and service outcomes. Participants move from understanding the main concepts to examining a case, testing alternatives and explaining a practical recommendation. The three modules focus on audience needs, message clarity and channel choice. Examples are selected after the training brief so that they reflect the responsibilities and experience of the participant group.

LEARNING OBJECTIVES

1. Explain the role of audience needs and identify the information required for a reliable assessment.

2. Use a structured worksheet to examine message clarity and compare reasonable alternatives.

3. Identify assumptions, missing evidence and implementation concerns related to channel choice.

4. Prepare a customer improvement proposal and success measures for discussion with a marketing or customer-service team.

5. Translate the exercise into a workplace action plan with owners, review points and measurable progress.
